

Rethink your water use without thinking about it at all

By giving you the means to monitor and control how long you spend showering, we'll also give you the power to rethink certain daily habits – without thinking about them at all.

*A one-minute hot shower uses as much energy as leaving every light on at home for a day**

The smart choice for a better future

With our new hand shower, sustainability meets 'plug-and-play'. So you can make better choices without feeling restricted in any way.

Efficient and smart

- Easy to use
- Cost effective – start saving money right away
- Connect shower head to hose in under one minute – no tools required
- Can store data on up to 150 showers
- Connect to app and track your consumption
- Made to fit any shower design

Sustainable

- Save water and energy
- Durable and long-lasting
- Runs on hydropower – no batteries needed
- Every component can be easily separated and recycled
- Made in Europe in accordance with the highest quality standards

Winner of the German Design Award 2021's Bath and Wellness and Eco Design categories

"The smart, hand-held shower head has an integrated display that enables users to optimise their showering behaviour with regards to water and energy consumption. An intriguing approach that intelligently combines modern design and sustainability and, in doing so, promotes more conscious handling of limited resources."

HANSAACTIVEJET Digital
Designed to help you save water – with little effort

With our new hand shower, live life more sustainably

Hot water is the second-largest consumer of energy in the average home – with showers accounting for 66% of this figure.*

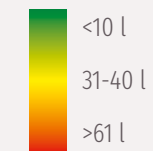

But it doesn't have to be this way.

With our stylish digital hand shower, we'll make green living feel like second nature to you. Without any interruption to your daily comfort.

*European Environment Agency (2012) / Split of ICT & Lighting inferred from bdew (2010)

LED light signals water usage:

Real-time feedback

- Look to the big display for detailed information on total water and energy consumption
- Use the front LED to track water usage: green indicates low levels of water usage, while red indicates high levels

Clever design

- No batteries required: shower head powered by water flow
- Durable and sturdy structure made to fit all standard showers

Extra comfort

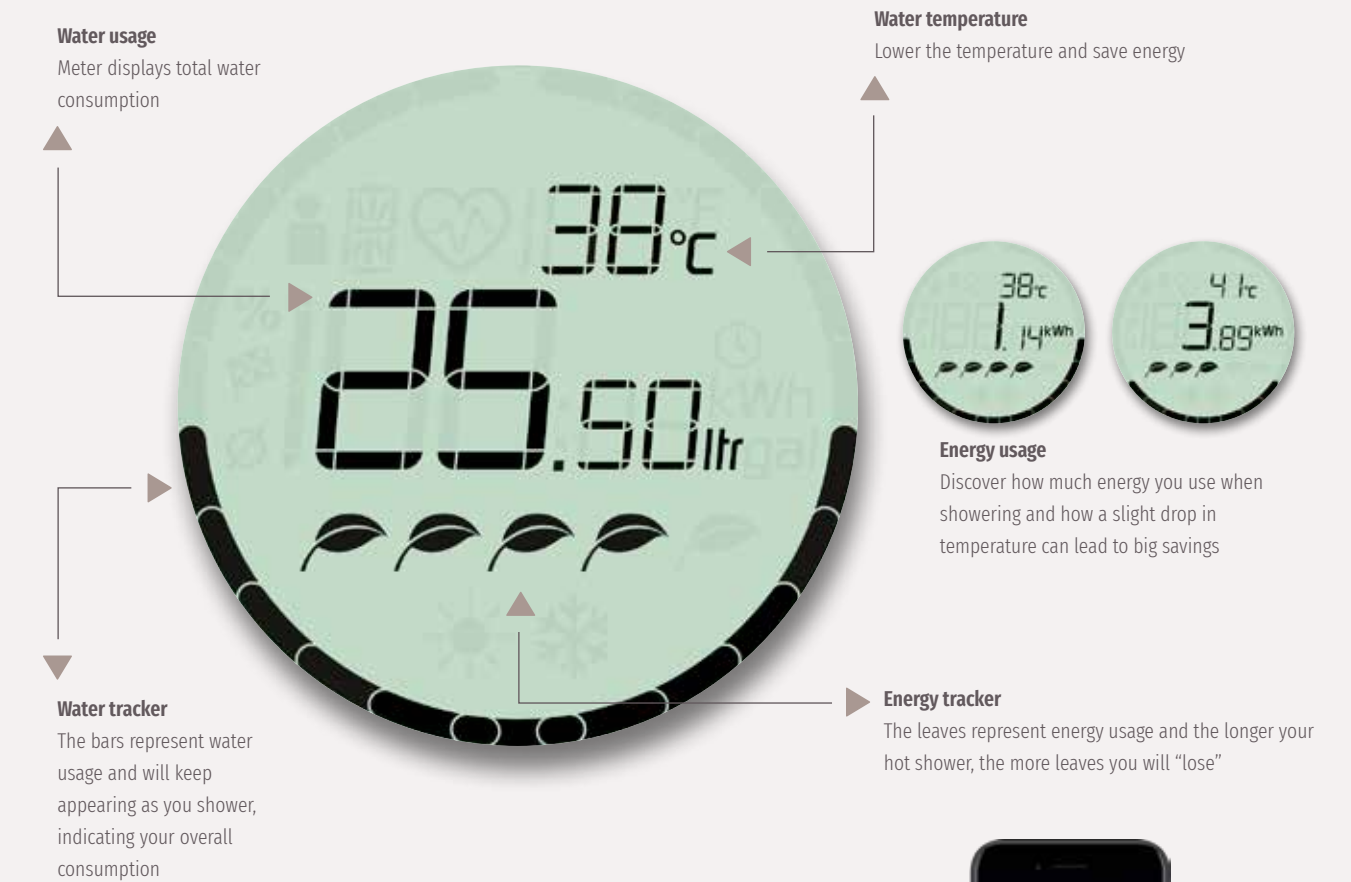

- Large shower head
- Wide and gentle rain spray

With real-time feedback, reduce your water and energy consumption up to 22%*

*Management Science 2018 - Overcoming Salience Bias: How Real-Time Feedback Fosters Resource Conservation; Tiefenbeck, Goette, Degen, Tasic, Fleisch, Lalive, Staake (2016)

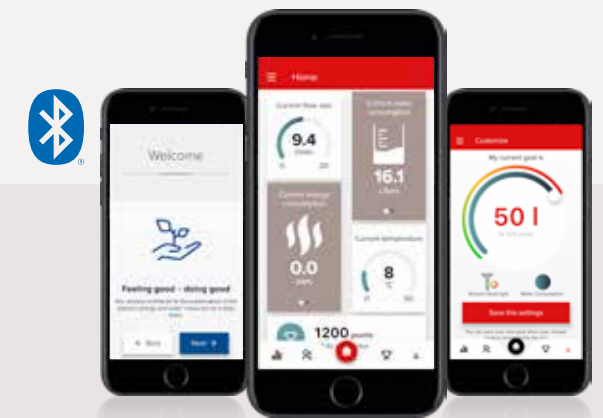

The power of real-time feedback

Studies show that real-time feedback is key to helping us change certain behaviours, with the average three-person household reducing their showers by one minute as a result. This amounts to roughly 22% less water every year – equivalent to 10,500 litres.

Connect to the app and transform your relationship to water

Connect the Bluetooth-enabled hand shower to your HANSA Connect App to set water consumption goals, receive data on your long-term usage, and to access tips on saving water.
